## How We Compared Providers

Our ranking methodology is built on a strict set of criteria designed to protect your account while ensuring measurable growth.

**Account Security**

We prioritized services that do not require your password. Any provider that asks for your login credentials is a red flag that we immediately excluded, as your security is the most critical element of the process.

**Delivery Quality**

We tested the "look" of the engagement. We looked for accounts that have profile pictures and a history of activity, ensuring that the likes you receive appear natural to anyone auditing your profile.

**User Experience**

We evaluated the entire journey from landing on the homepage to receiving the final confirmation email. A fast, responsive, and clear interface is vital for a good user experience.

**Customer Support**

We reached out to support teams with dummy questions to test their knowledge and response time. The best providers show empathy and solve problems quickly.

**Overall Value**

We analyzed the price-per-like ratio to ensure that the cost matches the quality of the service. High value is a balance of performance, security, and affordability.
